PROFESSIONAL EXPERIENCE

Swiftcareer.co

Nov 2023 - Present

Frontend Developer

I had the opportunity to design and build the SwiftCareer.co website from the ground up, where I focused on creating a responsive user experience. Working closely with the team, I also contributed to developing core parts of the web application, implementing key features that streamline the user journey. This project allowed me to blend my technical skills in front-end development with a keen eye for usability and design, resulting in a polished platform that helps users achieve their career goals efficiently.

School Project

Feb 2023 - Feb 2023

Group leader

Created a dynamic, user-focused website for an orphan sponsorship program that delivers an immersive experience to engage and encourage users to contribute. Leveraged React.js, React Router DOM, and Tailwind CSS to build a responsive and visually appealing interface that highlights the programs mission and makes supporting orphans easy and intuitive.

Personal Project

Mar 2023 - Mar 2023

Developer

Built an interactive quiz application with React.js that allows users to create, store, and retrieve questions and answers using Firebase Real-time Database. Designed for a smooth and engaging user experience, this application enables seamless interaction with dynamic quiz content.

Alt Schools

Oct 2022 - Jan 2023

Group leader

As a personal project, I recreated the website for AltSchool Africa, a forward-thinking educational platform focused on providing an alternative to traditional academic institutions through practical, tech-driven learning. AltSchool Africas mission resonates deeply with me to empower learners across Africa with career-ready skills and inspire them to contribute meaningfully to their communities and the continents growth. Through this project, I honed my skills in web development while gaining insight into the power of education as a catalyst for socio-economic advancement.

By carefully replicating the design and functionality of AltSchool Africas website, I was able to enhance my understanding of front-end technologies and improve my attention to detail. This project has strengthened my ability to create clean, responsive, and user-centered web experiences while also deepening my appreciation for AltSchool Africas impactful vision.

EDUCATION

Alt Africa

Sep 2023 - Aug 2024

Diploma

Alt schools offers a range of extensive technical courses specifically designed to equip learners with the knowledge and skills required to kickstart their careers and compete favourably with their peers worldwide. Alt offer various technical courses that equip its students with the knowledge and skills required to start, switch, or boost your tech career. To ensure students have all they need.
